

When it rains... it drains! Can you find what's messing up your water?

WHAT CAN YOU DO TO HELP?

- Don't use automatic car washes and car wax
- Don't use paint cans
- Wash and change
- Don't put motor oil in the garage
- Don't use antifreeze
- Don't use oil in your car
- Don't use antifreeze in your car
- Don't use antifreeze in your car
- Don't use antifreeze in your car
- Don't use antifreeze in your car

MAKE STORM DRAINS

- Don't put anything in the drain
- Don't use grease
- Don't use antifreeze
- Don't use antifreeze in your car
- Don't use antifreeze in your car
- Don't use antifreeze in your car

"WHEN IT RAINS... IT DRAINS"

The water that rains down on your roof and runs down the street is not just water. It's also a mix of oil, paint, antifreeze, and other pollutants that can harm the environment. These pollutants can get into the ground and eventually find their way into the water that we drink. So, when it rains, it drains. And that's why it's so important to take steps to reduce the amount of pollutants that get into the storm drain system.

By taking a few simple steps, you can help protect the water that we all depend on. Don't pour oil, paint, or antifreeze down the drain. Don't use antifreeze in your car. Don't use antifreeze in your car. Don't use antifreeze in your car.
